- it helps one in choosing the best job
Summary of the need assessment survey before the career development program

- 50 questionnaires were prepared, printed and dispatched for distribution. 42 were randomly distributed among 4 schools and only 30 were duly completed and returned.
- Short interview sections were conducted for some randomly selected teachers.
- All of the schools visited had no career counselor neither is it included in the curriculum.
- They however believed that proper and adequately funded career development program is of great benefit to the students.
- Thus, results collated from questionnaires and other measuring tools indicated the need for the training.
